

The purpose of my audit was to test the internal controls of Sancton Parish Council's financial records and check the accuracy of its annual reports for the year to 31/3/16. The internal controls were mainly tested by sampling and this was done by examining the level of records held from original documents through to bank statements and vice versa. The reports were checked by examining them against original records and bank statements.

I did not find any issues with any of these areas.
